

The Kube Touch Solution

KUBE TOUCH embodies the evolution of the traditional cash register where the touch screen system (KUBE T) is combined with the fiscal printer (KUBE F), to provide a more high-performance and practical solution for the retail market.

Thanks to touch technology, the traditional mechanical keyboard can be avoided, assuring unlimited use of direct keys, and enabling the operator to work faster, with greater accuracy.

The KUBE TOUCH solution can be fully customized by the user, both regarding the touch screen interface and all the programming functions.

KUBE T is equipped with an LCD backlight 20x2 character customer display and can drive alphanumeric display and additional printers.

KUBE T is a touch screen with a compact and elegant design; the LCD 10.4" monitor, ergonomic and touchresistant, is tiltable.

KUBE T is equipped with a reader/writer chip card for the purpose of building customer fidelization.

Kube Touch for Kiosk e Tobacco Shop

Moreover it is available a special software version developed to solve the requirements of these activities.

Reading the barcode of the packet of cigarettes, of the phone recharge, etc., the KUBE TOUCH system allows the automatic summary on the managerial ticket of the goods sold VAT-free, simplifying the total counting transactions, sharing the fiscal and not fiscal.

Main features and performances:

General specifications:

- Tilttable and adjustable
- CPU card with Celeron fanless processor
- 10.4" TFT backlight colour screen (800x600)
- Touch resistant
- LCD 20x2 backlight display (customer side)
- Chip card reader/writer

Memories:

- 256 MB SDRAM
- 128 KB battery-backed non volatile memory
- possibility to have 2.5" hard disk (optional)

Interfaces:

- 2 USB interfaces with A-type connector (USB 1.1)
- 2 PS2s for mouse and keypad
- 1 Ethernet 10/100Mb (RJ45) interface
- 1 RS232 serial (DB9)
- 3 RS232 serials (RJ45)
- Connector for supplying an external printer
- 2 Slot for Compact Flash

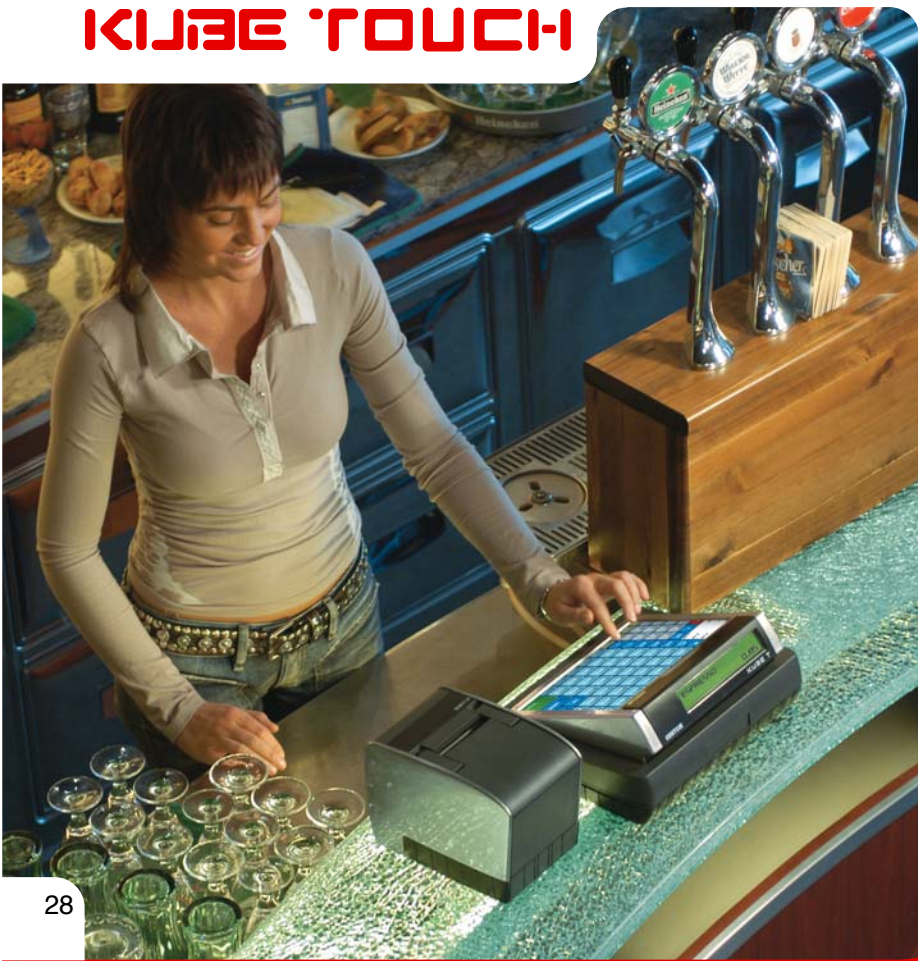

Functions:

- 1,500 Departments
