

KUBE ETH

KUBE and X KUBE ETH are printers with Ethernet interface and web server embedded. They become an ideal solution as wireless printer (standard 802.11b) thanks to the WI-FI ADAPTER, a device that can be connected up to 100mt range in a suitable environment CUSTOM that is included, without feeding necessity. To complete the WI-FI solutions range, it is available the ACCESS POINT that can be connected to the printer as the ADAPTER.

Wireless LAN Smart Access Point & Station Adapter

Standard: IEEE802.11b, Wireless Speed: 11Mbps
 Protocol supported: TCP/IP/IPX/NetBEUI
 Security: 40bits and 128bits/WEP encryption
 Access Control (MAC address filter)
 LED indicators: AP active/Wireless transmits
 Ethernet active
 Antenna: Internal Diversity Antenna
 Power supply: DC 5V

Internal Printing Server Kube ETH

Friendly web window pages allow you to monitor printer status, to set both printer working parameters and network configuration. You can configure the email service to make maintenance and diagnostic operations easier. A support area is available for downloading user manuals, printing drivers, software tools and furthermore to directly upgrade online the printer firmware!

MULTICOMM8

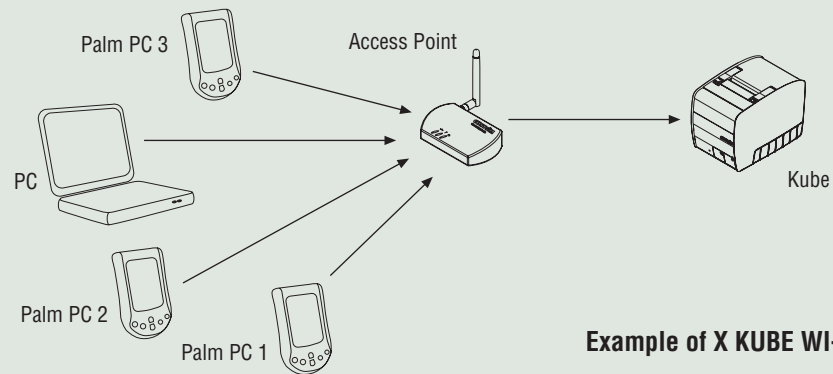

Multi-serial RS232 switch with 8 outputs

KUBE ETH

- Very Fast and Quiet
- Robust and Reliable
- Paper Width 80mm / 82.5mm
- Large Paper Roll
