### Multimedia minikiosk

Mini Kiosks are interactive, multi-functional terminals that operate through a high performance PC monitor incorporated in a resilient metal modular body.

Mini Kiosks are the ideal solution for supplying advanced services in all kinds of locations, thanks to their wide range of accessories (touch-screen, barcode reader, card reader, thermal printer) and their easy adaptability to the requirements of the application in question.

The modularity that distinguishes the Minikiosk, its attractive design, its wide range of accessories and optional devices, makes the MiniKiosk a strategic tool which will enable you to offer new, improved services, strengthen your brand and enjoy increased profit opportunities.
