ACCESSORIES

The ejector found in the cutter optional module may be programmed in two modes. This makes the printer extremely flexible in terms of compatibility, and easy to integrate in any kiosk:

- Cut and hold => the ticket is held after cutting, until the user collects it. This function is recommended for installations where the printer is directly connected to the outside of the kiosk.
 - Cut and drop => in kiosks equipped with ticket outlet chute, the ejector can be programmed so as to eject the ticket and drop it. It should be assured that the ticket is delivered to the customer and does not remain inside the kiosk.
-
- Wi-Fi or Bluetooth module available
