

TK180

Boarding Pass and Bag Tag Printer

TK180 is the most compact combined ATB and BTP printer with native AEA/ITPS firmware for a seamless integration in CUTE and CUPPS platforms. Specially designed for small check-in desks where space is limited, TK180 can handle ATB coupons as well as GPP paper rolls. The bag tag support is provided by the optional paper roll holder. TK180 can be easily configured as either an ATB or BTP device through the setup. TK180 features an automatic sensor calibration that activates each time paper is loaded, preventing ticket wastage. This enhances environmental sustainability while reducing management costs.
