

BIG 3

BIG II's technological evolution

BIG 3, BIG II's technological evolution, from which it has inherited all its functional features, introduces Custom new technology for the future payment telematic transmission, becoming law in Italy starting from 1/1/2017. Big 3 represents the ideal product for all the stores asking for functionality and ease of use, looking for high performances and exclusive design.

BIG 3 offers Ethernet connectivity and automatic e-mail sending to forward fiscal data reports about sales and statistics, or for our on line technical assistance. The internal advanced SQL database allow you to quickly access 50,000 PLU with barcodes.

CARATTERISTICI

- Unique and elegant design
